**LEGEND:**

\*non-native species Florida Invasive Species Council (FISC) Invasive Category:

**CAT I**- invasive plants which are altering native plant communities by displacing native species, changing community structures or ecological functions, or hybridizing with natives

**CAT II**- invasive plants which have increased in abundance or frequency but have not yet altered Florida plant communities to the extent shown by Category I species

\*\*imperiled species Conservation Status Description:

GLOBAL CONSERVATION STATUS RANK -- Florida Natural Areas Inventory (FNAI)

**G1** = Critically imperiled globally because of extreme rarity (5 or fewer occurrences or less than 1000 individuals) or because of extreme vulnerability to extinction due to some natural or man-made factor.

**G2** = Imperiled globally because of rarity (6 to 20 occurrences or less than 3000 individuals) or because of vulnerability to extinction due to some natural or man-made factor.

**G3** = Either very rare and local throughout its range (21-100 occurrences or less than 10,000 individuals) or found locally in a restricted range or vulnerable to extinction from other factors.

**G4** = Apparently secure globally (may be rare in parts of range).

**G5** = Demonstrably secure globally.

STATE CONSERVATION STATUS RANK-- Florida Natural Areas Inventory (FNAI)

**S1** = Critically imperiled in Florida because of extreme rarity (5 or fewer occurrences or less than 1000 individuals) or because of extreme vulnerability to extinction due to some natural or man-made factor.

**S2** = Imperiled in Florida because of rarity (6 to 20 occurrences or less than 3000 individuals) or because of vulnerability to extinction due to some natural or man-made factor.

**S3** = Either very rare and local in Florida (21-100 occurrences or less than 10,000 individuals) or found locally in a restricted range or vulnerable to extinction from other factors.

**S4** = Apparently secure in Florida (may be rare in parts of range).

**S5** = Demonstrably secure in Florida.

STATE LEGAL STATUS

**SE** = Endangered: species of plants native to Florida that are in imminent danger of extinction within the state, the survival of which is unlikely if the causes of a decline in the number of plants continue; includes all species determined to be endangered or threatened pursuant to the U.S. Endangered Species Act.

**ST** = Threatened: species native to the state that are in rapid decline in the number of plants within the state, but which have not so decreased in number as to cause them to be Endangered.

**LEGEND (continued):**

FEDERAL LEGAL STATUS

**FE** = Endangered: species in danger of extinction throughout all or a significant portion of its range.

**FT** = Threatened: species likely to become Endangered within the foreseeable future throughout all or a significant portion of its range.
